

# Download the Mobile App

## Summary

The BuilderPal mobile app gives you all the power of the desktop platform, optimized for fast, simple, on-site work. You can access your projects, clock in and out, upload photos, communicate with your team, and receive instant notifications — all from your phone.

Whether you're a supervisor, tradesperson, or business owner, you can download the app and sign in using the same email and password you use on desktop.

## Prerequisites

- An iOS or Android device

## Steps

1. **Download for iPhone (iOS) — tap the link or search in the App Store, then install and open.**

3. **Log in using your BuilderPal email and password.**

## Confirmation

Once logged in, confirm by accessing your projects and features like clocking in/out — the app is ready for use, mirroring desktop functionality optimized for mobile.

## FAQ

### What if I forget my password?

Reset it via the "Forgot Password" link on the login screen or desktop site.

### Is the app available in my region?

BuilderPal app is available worldwide in the App Store and Google Play.

### What are the minimum device requirements?

iOS 14 or later for iPhone; Android 8.0 or later.

### **Why can't I find the app in the store?**

Ensure you're searching "BuilderPal" exactly; check your region's store availability or contact support.

### **Can I use the app without internet?**

Some features like viewing cached data work offline, but uploads and updates require connection.
